

Retail Operations Master Glossary

Official operational vocabulary definitions for store staff and supply chain.

MDQ (Minimum Dispatch Quantity)

Smallest batch size the warehouse will dispatch to a retail store location.

SOH (Stock on Hand)

Physical, sellable plant and ceramic inventory present on store premises.

RTV (Return to Vendor)

Formal return flow for defective, dying, or unmarketable plants back to central nursery.

DOA (Dead on Arrival)

Severe plant mortality or ceramic breakage detected during inward unboxing audit.

Planogram

Visual diagram specifying exact SKU placement, shelf heights, and visual hierarchy on store fixtures.

CCA (Customer Care Associate)

Frontline store associate responsible for plant care, customer consultations, and POS transactions.

Indent

Replenishment order created by the store manager based on run-rate and safety stock.

FIFO (First In, First Out)

Inventory rotation protocol ensuring older plant batches are sold before newer arrivals.

Chlorosis

Foliage yellowing resulting from root rot, poor light, or overwatering; triggers recovery bay triage.
