

Retail MDQ & Indent Calculation Matrix

Standard calculation rules, safety stock parameters, and dispatch thresholds.

1. Primary Replenishment Formula

$$\text{Indent} = [\text{Target (Safety + Cycle)}] - \text{Current SOH} - \text{Stock in Transit}$$

2. Category Minimum Dispatch Quantity (MDQ) Table

Category	Product Type	MDQ Unit	Review Cadence
Live Plants (A-Tier)	Bonsai, Sansevieria, Money Plant	6 Units / SKU	Twice Weekly (Mon & Thu)
Live Plants (B-Tier)	Flowering Plants, Ferns, Succulents	12 Units / SKU	Twice Weekly
Planters & Ceramic	Designer Ceramic Pots, Self-Watering	4 Units / Box	Weekly (Tuesday)
Care & Nutrition	Organic Fertilizer, Plant Food, Mistlers	10 Units / Carton	Bi-Weekly

3. Indent Verification Guidelines

- Cut-off Time: Store managers must submit indents before 14:00 hrs on review days.
- Approval SLA: Area Retail Manager must approve indents within 4 hours of cut-off.
- Nursery Buffer: ±3% variance allowed for pot size variations during picking.
